## COMING TOGETHER TO MOVE THE MARKETS

The formation of SASB is the biggest event for improving the usefulness of information available to the capital markets since the creation of FASB in 1973. SASB is an ambitious organization that is quickly gaining momentum—in just a few years, SASB has developed provisional standards for 79 industries, engaged thousands of participants in its standards setting process, and garnered more than 10,000 media mentions. SASB’s Investor Advisory Group—which supports SASB’s approach—is comprised of 27 asset owners and asset managers with more than \$20T in assets, including BlackRock, CalPERS, CalSTRS, State Street Global Advisors, and Vanguard. Join a growing movement of organizations and individuals that believe sustainability disclosure must evolve to meet the needs of today’s markets.

	DISCOUNT	YOUR PRICE
