

Accounting for a Sustainable Future

LICENSE SASB FRAMEWORK

Supporting ESG Innovators

Providing the Materials Needed for Better ESG Tools, Products, and Services

WHAT'S POSSIBLE

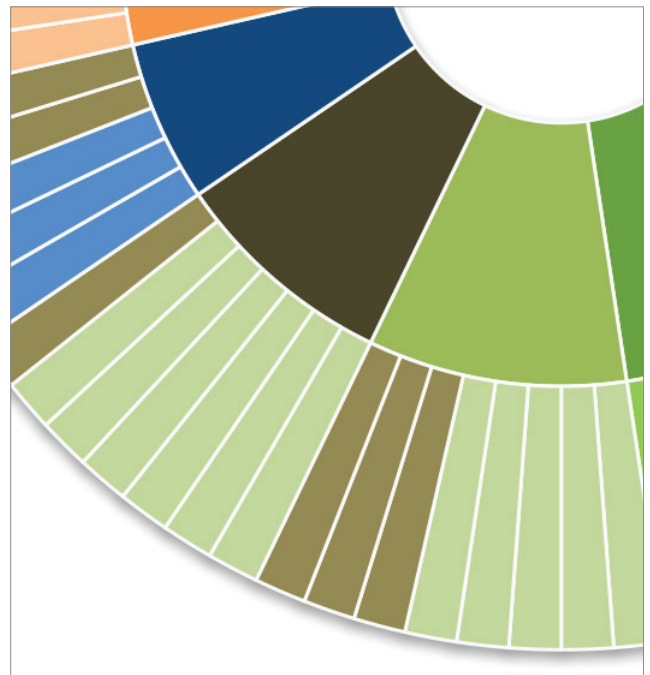

New ESG products are announced every month, ranging from portfolio analytics and ratings systems to indexes and ETFs. By developing a market standard that meets the needs of both investors and issuers, SASB's framework can serve as the underlying infrastructure supporting your unique, proprietary products, allowing you to focus on your core competencies and value-add.

WHAT'S AVAILABLE

By offering its files in a range of digital formats, SASB makes it easy to use its innovative SICS® industry classification system, materiality map, and/or SASB standards. SASB can map its metrics to other ESG metrics or databases that you provide.

WHAT YOU RECEIVE

- License to incorporate selected materials in an internal platform and/or publicly available commercial product
- Regular updates to content when changes are made
- Clear guidelines on SASB logo use and association
