

LAYING THE GROUNDWORK FOR EFFECTIVE TCFD-ALIGNED DISCLOSURES

- ✓ Secure the support of your board of directors and executive leadership team
- ✓ Integrate climate change into key governance processes, enhancing board-level oversight through audit and risk committees
- ✓ Bring together sustainability, governance, finance, and compliance colleagues to agree on roles
- ✓ Look specifically at the financial impact of climate risk and how it relates to revenues, expenditures, assets, liabilities, and capital
- ✓ Assess your business against at least two scenarios
- ✓ Adapt existing enterprise-level and other risk management processes to take account of climate risk
- ✓ Solicit feedback from engaged investors to understand what information they need regarding climate-related financial risks and opportunities
- ✓ Look at existing tools you may already use to help you collect and report climate-related financial information (e.g., CDP, CDSB, SASB)
- ✓ Plan to use the same quality assurance and compliance approaches for climate-related financial information as for finance, management, and governance disclosures
- ✓ Prepare the information you report as if it were going to be assured
- ✓ Look at the existing structure of your annual report and think about how you can incorporate the recommendations

LAUNCHING THIS APRIL:

The TCFD Implementation Guide

With their upcoming *TCFD Implementation Guide*, the Climate Disclosure Standards Board (CDSB) and Sustainability Accounting Standards Board (SASB) provide “how to” guidance to move TCFD disclosure from principles to practice. In the meantime, this checklist will help you get started.

TCFD Knowledge Hub

CDSB and the TCFD have developed an online platform that provides the latest tools, resources and insights to help organizations learn about disclosing climate-related information and implement the TCFD recommendations.

About CDSB

The Climate Disclosure Standards Board (CDSB) is an international consortium of business and environmental NGOs. We are committed to advancing and aligning the global mainstream corporate reporting model to equate natural capital with financial capital.
