

Organizational **Membership**

Asset owners, asset managers, companies, and service providers have joined the SASB Alliance to be part of the global effort to develop and explore best practices to integrate material sustainability information into existing processes. Members receive ongoing educational resources and invitations to exclusive member-only discussions. Members share the belief that today's capital markets need standardized sustainability disclosure and effective ESG integration into investment practices – for the benefit of both companies and investors.

The SASB Alliance includes two levels:

PARTICIPANT MEMBERS

USER MEMBERS

WHAT'S THE DIFFERENCE?

Participant Members receive the benefits listed →

User Members receive the benefits listed →

+ SASB IP Rights

(see reverse page for details)

Organizational Membership

BENEFITS OFFERED TO USER MEMBERS

SASB IP Rights

In addition to the current benefits provided to all members, User members receive:

» The **rights** to use SASB's materiality framework in commercial activities, including internal business processes, products, and services (SASB's Materiality framework is freely available for non-commercial use by companies disclosing consistent with the standards or those advocating for disclosure)

» An **annual subscription** to SASB's materiality framework **data files**: [SASB Materiality Map™](#), SASB Standards, [SICS™](#) industry classification data for 88,000+ Global ISINs (updated quarterly), and related content.

» **Mapping to third party data sets** and technical consultation with SASB staff on the standards structure and rationale

» A **SASB Inside mark/logo** (representing the gold-standard for financially material ESG information) that can be freely used to describe your proprietary research, using SASB's materiality framework as an input

WHAT DOES IT MEAN THAT USER MEMBERS RECEIVE LICENSING RIGHTS TO USE SASB IP?

SASB publishes the standards and related IP (e.g. Materiality Map) as a public good for non-commercial use, such as public reporting or investor engagement with portfolio companies. Licensing rights allow organizations to incorporate the standards and related IP into the investment decision-making process as well as products and services from a range of organizations across the capital markets.

We understand that in order to change practices, policies and processes, **we need to work together** to understand the nuances, strengths and opportunities that other institutional investors are seeking around varying dimensions of sustainability

-**RODRIGO GARCIA**, DEPUTY TREASURER AND CHIEF INVESTMENT OFFICER
