The Rules of Procedure exposure draft is very clear on the ways stakeholders can participate in the SASB process for standard-setting in terms of avenues of communication. However, given that ‘market-informed’ and ‘transparent’ are two of SASB’s fundamental tenets, it would be helpful to provide more clarity on how SASB considers stakeholder/industry input, and whether there is a formal process for this or it is more ad-hoc, how different feedback is prioritised, and how input makes it onto the agenda. Furthermore, this also applies for feedback or concerns on the Standards Board’s execution of its due process.
