Hello Ekaterina

Herewith some minor comments and suggestions in the attached.

- Regarding EM-MM-150a.1. "This should rather be quoted in mass i.e. million tonnes (Mt)".
- Regarding term impact in Paragraph 17: add "or consequence to be consistent with GISTM."
- Regarding "tailings" in Paragraph 19: should be "tailings solids".
- Regarding Table 1a: replace "built" with "constructed".
- Regarding Table 1a: replace "failure classification consequence with "failure consequence classification".
- Paragraph 33: "Total weight of non-mineral waste generated" should be "Total quantity or mass (Mt) of non-mineral waste generated".
- Regarding EM-MM-150a.4. on page 36: "Total weight of tailings produced" should be "Total quantity of tailings produced".

We found the document a little difficult to read, and recommend closure alignment to (or reference) to the GISTM Principle 15.

Thank you again for reaching out to us directly for review and comment.

All the best

Regards

Charlene
