Thank you for the clarification. Sorry. I foresee many issues.

1. small and medium-sized enterprises are excluded from the ESG reporting - I.e. from taxonomy in EU. I am from Bulgaria - EU member state.
2. The ESG report needed for the screening is very complicated and there is no standard for it i e is not possible accurate comparison of the enterprises
3. The problem with audit is not clear. the audit seems to be possible only by the Big 4.
4. Another problem is the issue of eliminating the possibility of conspiracy, combinations and abuses.
5. The absolutization of green energy and the elimination of its alternatives also seem to be a problem. We have seen what happened in Texas.

Best regards:

NK

(assign)

Dear Ninel Nesheva-Kiosseva,

Thank you for taking the time to respond to our taxonomy release. If I could make one request, did you mean to say "I foresee many issues with the taxonomy" or did you mean to say " I don't foresee any issues with the taxonomy".

If you foresee many issues, then it would be very helpful to understand your concerns in more detail.

Best Regards,

Madhu Mathew

Director of Technology, SASB
