SASB Climate Risk Framework

SASB Standards offer insights to providers of financial capital to better understand their exposure to climate risks and opportunities identified in the Task Force on Climate-related Financial Disclosures (TCFD).

In 2016, SASB released its original Climate Risk Technical Bulletin to inform the deliberations of the then newly-formed TCFD and solicit market feedback on the then provisional Standards. SASB recently published a revised edition of the technical bulletin in April 2021.

Although climate risk is virtually omnipresent, cutting across every sector, it manifests differently from one industry to the next.

The SASB Standards Research Staff has conducted a detailed mapping of the types of climate risk likely to be material in each industry so that investors can understand the nature of the risk they are exposed to depending on the holdings in their portfolio.

**Where SASB Standards Align with TCFD Climate Risk Categories and Financial Impact Channels**

Investors can employ other strategies to manage climate risk, such as balancing exposures through sector allocation, focusing exposures on best-in-class securities, and actively engaging with portfolio companies on key climate-related factors to encourage improved performance.

SASB Standards provide climate-related metrics that focus on the direct “levers” available to a company—and measure how the company is using them—to provide actionable data to management and decision-useful information to investors (see table on following page).

To this end, SASB Standards aim to identify disclosure topics that link directly to operational or strategic decisions made by a company.

### Ubiquity of Climate-Related Financial Risk in SASB Standards

<table>

SASB Standards & TCFD

The impacts identified by the SASB Climate Risk Framework are mapped to those of the TCFD’s Final Recommendations.

Access the SASB Climate Risk Framework

The Value Reporting Foundation offers the full SASB Disclosure Topics and the corresponding climate risks from the TCFD and the SASB Climate Risk Bulletin in an Excel file:

- Physical Effects Climate Risk
- Transition to a Low-Carbon, Resilient Economy Climate Risk
- Climate Regulation & Climate Risk

Enhanced insights and practical application of the Climate Risk Framework can be achieved through pairing the Climate Risk Framework with:

- SASB Standards
- SICS® Taxonomy
- Financial Impact Channels
- 3rd party mapped data files
