

SASB Standards

Sustainability Issues are Business Issues

Are you looking to integrate the SASB Standards (Materiality Map™) formally in your work?

The SASB Materiality Map™ is a visualization of the 77 Industry Standards.

Licensing SASB Standards IP makes it easy for asset managers, asset owners, data and research firms, and corporate reporting software providers to use SASB Standards to focus their processes and products on the ESG information that effects enterprise value creation.

Access the SASB Standards in a flexible Excel file structure at different levels of granularity to best suit an organization's use case:

- » **Level I:** Includes SASB Standards Disclosure Topics for all 77 SICs® industries (5-6 topics per industry and 444 in total)
- » **Level II:** Includes Level I and the 981 SASB Standards accounting metrics (10-13 metrics per industry 1-3 metrics per topic)

Enhance insights and practical application of the SASB Standards by pairing them with:

- [Financial Impact Channels](#)
- [SICS® Taxonomy](#)
- [Third-party data mappings](#)

Find answers to common questions on the [SASB Standards website](#).

SASB Standards

Sustainability Issues are Business Issues

Understanding Commercial Use

Commercial applications such as integration into investment analysis, research methodology, product development, reprinting or creating derivative works would require a licensing relationship.

SASB Standards are freely available for companies disclosing consistent with the Standards or those advocating for disclosure.

Further engaging with the SASB Standards

[Licensing Program](#): Provides licensing rights to the Standards, SICs®, Disclosure Topic Financial Drivers and Climate Risk Factors tied to TCFD Recommendations, along with marketing materials, technical support and a robust toolkit for organizations interested in leveraging SASB Standards IP in their processes.

[IFRS Sustainability Alliance](#): IFRS Sustainability Alliance is a membership program and helps explore best practices to integrate material sustainability information into existing processes. Members receive ongoing educational resources and invitations to exclusive member-only discussions. Members share the belief that today's capital markets need standardized sustainability disclosure and effective ESG integration into investment practices – for the benefit of both companies and investors.
